HALO

ROOKIE

COSPLAY GUIDE

One of the coolest elements of video games is the unique way they can make you feel like you're truly immersed inside your favorite universe or franchise. From Spartans and Spectres to Gears and Grey Wardens, it can be exhilarating to step inside the experience to truly become your favorite character.

For some fans though, their passion for truly becoming part of the universe is on an entirely different level.

Halo has been incredibly blessed to have such a massive and engaged cosplay community, with dedicated members all over the world pouring their heart, soul, and skills into bringing the universe to life. We're always impressed by the lengths that cosplay creatives will go to in order to lend a helping hand to others. Whether it's assisting someone on their first build, bringing extra foam and Velcro to share at an event, or making an appearance at a moment's notice to support a good cause, cosplayers are very often at the forefront of what it means to truly be a community.

Guides like these are one way we would like to continue our own involvement in these endeavors—compiled by dedicated 343 team members from across the studio eager to help provide some additional assistance to fans through official assets, reference shots, material guides, turnarounds, contextual information, stats, details, and more. We hope you enjoy this particular contribution to your own creative process, and we can't wait to see what you make next.
